For: Turpak Elektromanyetik Yakıt İkmal Sistemleri A.Ş
Vatan Cad. Ortadoğu İş Merkezi No 3 Kat 4
Çağlayan-Kağıthane/İstanbul

Dear Mr. Tamer Sengonul,

This is further to your request for your customer's interest in the Wet Stock Management solution and information requested regarding this system.

With reference to the requested details of Turpak's Wet Stock Management solution, we confirm as follows:

Lukoil's Wet Stock Management Solution provided by Turpak is an online system dedicated to monitor our fuel stocks and their potential associated losses throughout our stations network.

The above program was originally supplied and managed by Turpak A.Ş. for the last 3 years. With this platform we are continuously monitoring a turnover in more than 2500 tanks in a network of 560 fuel stations. After we have deployed this technology and its full implementation we have succeeded to improve significantly our results and accomplished a decrease of our losses.

Best Regards,

Omer IRSIDAR,
Automation Manager,
LUKOIL Eurasia Petrol A.Ş.
